

## Citrix Certifications

Show what you know and discover the benefits for yourself and your organization.

“Having the right certifications can open the right doors and such has been my experience. Having my CCA...allowed me the opportunity to be interviewed for my current position where I was hired to implement a 700 seat, 40 server Citrix farm.”

—James Hayes, VP, Renasant Bank, United States

“Attending the CCIA courses was absolutely worthwhile...The CCIA training serves to further the development of a CCEA toward becoming a Citrix consultant with comprehensive, detailed know-how enabling the planning of large-scale, distributed Citrix farms. This training was beneficial in every way and has proved an important building block in my career development.”

—Wolfgang Vogel, IT-Consultant/System Integration, pco Personal Computer Organisation GmbH & Co. KG, Germany

# Differentiate yourself and your organization

Citrix offers application delivery products and solutions that give IT the flexibility to change on demand. Citrix certifications prepare IT professionals to support their organizations in doing this. Today, Citrix is relied upon by IT teams and their strategic executives at more than 200,000 organizations throughout the world, including 100% of the Fortune 100 companies and 98% of the Fortune Global 500. With such a demand for our products, there is also a need for the skills to successfully implement and support them. Citrix certifications provide validation of those skills.

For organizations, Citrix certifications provide peace of mind and a competitive advantage when staff is trained and certified regularly. For IT professionals, Citrix certifications represent a well-recognized and respected IT credential that enhances marketability and competitive edge.
